

TECHNICAL REPORT:
Comprehensive Quality Analysis of Equispec
Manufacturer: Spectrum
Dosage: 200mg/ml

INTRODUCTION

This analytical report provides a detailed examination of Equispec product from Spectrum, focusing on purity assessment and concentration verification using advanced chromatographic techniques to ensure pharmaceutical quality standards.

METHODOLOGY

Concentration encountered (IU)	195.6 mg/ml
Purity (%)	97.8

DISCUSSION

CONCLUSION

The product meets all quality specifications with excellent purity profile and accurate concentration levels, making it suitable for pharmaceutical applications without any significant impurities detected during the comprehensive analysis process.
