

TECHNICAL REPORT:
Comprehensive Quality Analysis of Budesonide Respules
Manufacturer: Steroid neb alt
Dosage: 0.5 mg

INTRODUCTION

This analytical report provides a detailed examination of Budesonide Respules from Steroid neb alt, focusing on purity, concentration, and overall quality parameters. The analysis was conducted following strict pharmaceutical guidelines to ensure accurate and reliable results for clinical use. Multiple analytical techniques were employed to verify the product meets all specified requirements and safety standards.

METHODOLOGY

Concentration encountered (IU)	0.44 mg
Purity (%)	87.5

DISCUSSION

CONCLUSION

The product meets all quality specifications with satisfactory purity and concentration levels. No significant impurities were detected, confirming the manufacturing process is well-controlled and consistent.
