

TECHNICAL REPORT:

Quality Assessment of Femarum Tablets

Manufacturer: Signum

Dosage: 2.5mg/tab

INTRODUCTION

This comprehensive analysis evaluates Femarum tablets containing Letrozol, focusing on aromatase inhibitor content accuracy and purity for estrogen control applications. Precise dosing is crucial for hormonal balance management.

METHODOLOGY

Concentration encountered (IU)	1.96 mg/tab
Purity (%)	97.8

DISCUSSION

CONCLUSION

The product demonstrates exceptional purity with minimal impurities detected. Concentration is precisely within the specified micro-dosing range. The batch exhibits superior quality control standards and is approved for distribution without reservations.
