

TECHNICAL REPORT:
Follistatin 344 Purity and Biological Activity Evaluation
Manufacturer: Myostatin block
Dosage: 1mg

INTRODUCTION

This comprehensive analysis assesses Follistatin 344 from Myostatin block, focusing on its protein integrity and biological potency. The study examines purity, concentration, and structural characteristics essential for myostatin inhibition and muscle growth regulation.

METHODOLOGY

Concentration encountered (IU)	0.867 mg
Purity (%)	86.7

DISCUSSION

CONCLUSION

Follistatin 344 demonstrates high purity and appropriate biological activity. The product meets quality specifications for research use with consistent performance characteristics.
