

TECHNICAL REPORT:

Analytical Report on Boldenona Undecylenate

Manufacturer: Np

Dosage: 200mg/ml

INTRODUCTION

A detailed examination of Boldenona was conducted to determine its chemical purity and concentration. This supports quality assurance in veterinary or performance supplement contexts.

METHODOLOGY

Concentration encountered (IU)	142.40 mg/ml
Purity (%)	71.2

DISCUSSION

CONCLUSION

Purity is moderate with considerable impurities. Concentration is near specification. Enhancements in purification are needed for future lots.
