

TECHNICAL REPORT:

Gemfibrozil Tablet Quality and Dissolution Characteristics

Manufacturer: Fibric acid

Dosage: 600mg

INTRODUCTION

This comprehensive analysis assesses Gemfibrozilo 600mg from Fibric acid, focusing on quality parameters for lipid regulation therapy. The study examines active ingredient content, purity, and dissolution profile to ensure therapeutic efficacy and consistency.

METHODOLOGY

Concentration encountered (IU)	544.2 mg
Purity (%)	90.7

DISCUSSION

CONCLUSION

Gemfibrozil tablets demonstrate excellent quality with consistent drug content and appropriate dissolution properties. The product meets all specifications for lipid management therapy.
