

TECHNICAL REPORT:

Quality Assessment of Cutting Edge Steroid Blend

Manufacturer: Sqs

Dosage: 250mg/ml

INTRODUCTION

This detailed analysis examines Cutting Edge, a complex steroid mixture, focusing on component consistency and overall purity for cutting cycle applications. Product quality assurance is crucial for user safety and effectiveness.

METHODOLOGY

Concentration encountered (IU)	168.50 mg/ml
Purity (%)	67.4

DISCUSSION

CONCLUSION

The product demonstrates moderate purity with elevated impurity levels. Concentration is significantly below the specified value, indicating potential manufacturing issues. The batch requires careful review before consideration for release.
